

BEMO Environmentally Responsive

Bemo USA offers a broad range of materials and finishes that are environmentally responsible.

- The Bemo Panel System can be offered in materials that are 100% recyclable.
- Coating systems that offer Solar Reflective Index's that count towards LEEDS 2.2 (Leadership in Energy and Environmental Design) credits. Reducing the heat island effect by high reflectivity and emissivity is one of the ways Bemo supports Green Buildings.
- Coatings with Solar Reflective Index (SRI) values of up to 85.
- Field Forming panels count towards LEED's MR 5.2 credit for manufacturing within 500mile of the project location.
- It is possible to use specific coil and sheet mills that manufacturer metal coils that utilize up to 95% post industrial recycled content. Recycled content in materials counts towards credit earned under MR 2.1.

LEED's MR5.2 — Form Onsite
